INSTRUMENT DUO FOR SIMPLIFYING YOUR DAILY CASES

Streamline your restorative instrumentation with this duo that is all you need for your daily anterior and posterior direct composite restoration cases.

WHY?

These instruments are ideal for simplifying your daily cases: with just two instruments, you can perform most of your high-end anterior and posterior restorations.

WHAT?

LM-Arte™ Solo instruments simplify everything from modeling to ergonomics and even hygiene, with fewer instruments needed on the tray.

LM-431-433 ES

- Sharp tip**
Precision modeling
Micromodeling
Limit marking
Scratching
- Thin blade**
Proximal modeling
- Convex profile**
One-point modeling
Create depressions
Create buccal profile
Create cervical profile
Access difficult areas
- Straight edges**
Scraping
- Flat profile**
Flattening
Uniform
- Angled edge**
Definition
Scraping
- Sharpened edges**
Cut, split, separate
Marginal ridges
- Rounded tip**
Delicate delimitation
Cervical contouring

ONE INSTRUMENT FOR DIRECT VENEERING
LM-Arte™ Solo Anterior

LM-434-438 ES

- Flat profile**
Big excess removal
Medium excess removal
- Flat end**
Plugger
- Angulation**
Access for deep cavities
- Semi-rounded edges**
Slope forming
Excess removal
Margin removal
- 4-5 mm bulkfill safety area**
Probe for bulk fill materials
- Tapered profile**
Fine excess removal
Slope modeling
Secondary anatomy
- Sharp tip**
Precision modeling
Micromodeling
Limit marking
Scratching
Flow distribution
Bubble elimination

ONE INSTRUMENT FOR POSTERIOURS
LM-Arte™ Solo Posterior
