\$280/pc

**Gingival Cord Packer #0.3 Explorer Type**  
No.13100

Thickness / 0.3mm

- "Same angle with explorer" for smooth access to the tooth surface.
- Combination of inside and outside tip surface for smooth approach into gingival.
- Excellent utility work for all the cords and positions.

[How to use]

Outside surface for inserting the edge of cord.

Backside surface for inserting more part of cord.

Inside surface for the narrow space such as the space between the teeth.

## Sprayed edge for slipping prevention.

- Especially suitable for slippery silk-code and the difficult first-approach of insertion.

Prevent from "slipping" and "fraying" the cord.

**Sprayed edge part**

\$280/pc

**Gingival Cord Packer #0.3 for Posterior T/C**  
No.13110

※ Sprayed  
Thickness / 0.3mm
