

MADE IN THE USA

## Features / Benefits

- Easy to Use - Increases flossing compliance up to 80%.
- No Threading - Can floss entire mouth in 1 to 2 minutes! Typical flossing time using Floss Threaders is approximately 15 minutes.
- Disposable / Sanitary - Travels well. Can use it on the go.
- Ergonomic Design - Can floss with just one hand!
- Unique Spatula and Floss Innovation - Slides effortlessly under the archwire to an interproximal position.
- Eliminates Damage - Will not harm Archwire and Brackets!

PP-T130 (30/pack)

## Testimonial

Michelle, Woodside CA: *We are so very grateful for your product; it truly makes my daughter's flossing responsibility much more manageable! The orthodontist recently commented on what a great job she does with hygiene and we gave the Platypus® the credit due.*

Rea, Los Alamitos CA: *Brilliant! I'm an RDH and I have children with braces...and all their friends have braces. I can't wait to receive my order and start passing the Platypus® out to everyone! Great idea...wish I would have thought of this one myself!*

Brandy, Montevideo ID: *I am a mom of an 11 year old with braces. Her orthodontist gave her one of your Platypus® flossers that he had received as a demo. The first two nights that she had her braces we tried using floss threaders and dental floss and it took us 45 minutes to floss. Your Platypus® flosser has greatly reduced that time!*

Sandy - RDH, Saint Louis MO: *I am a dental hygienist and recently recieved some samples of your product at the office I work in. I have a son with ortho and I will be in full braces soon. My son loved using them and hasn't stopped asking about them since he ran out of the samples. Thank you!*
